Step by step instructions to install **Raised Kerb Trim Joiners**

Step 1

Make sure to leave an 8mm expansion gap between the two lengths of Raised Kerb Trim and position the foam sealant tape as in the diagram - one side cut to the same length as the trim and the other side overlapping underneath by at least 10mm.

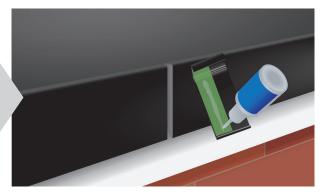

Step 2

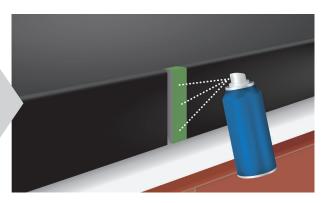

Apply superglue to ONE inside edge of the Raised Kerb Trim Joiner component.

Step 3

Apply uPVC superglue activator to the Raised Kerb Trim area where the superglued inside edge of the Raised Kerb Trim Joiner component is to be affixed.

Step 4

Firmly press the Raised Kerb Trim Joiner component down and onto the area where the lengths of Raised Kerb Trim are to be joined, and hold in place until adhesion is solid.
